

# XSRE & XSRE Lock

XSorise, XSorise, XSorise.  
Everyone's favourite  
accessory carabiner now  
has a screwgate locking  
option for added security!

Made with the same attention to detail as all standard size DMM carabiners, the XSRE oval carabiner is a beautiful, high performance accessory clip that has a functional industrial pedigree, yet crosses over easily into everyday life situations. Widely adopted for non-PPE use on industrial worksites, the XSRE is just as useful on a tree care harness to organise gear as it is clipping keys onto a belt loop.

The narrow, snag-free nose pierces rope and allows easy installation of remote systems.

The new screwgate locking version gives increased security when required - perfect when working at height or walking the dog.

## FEATURES

- Symmetrical oval shape
- Improved snag-free rope piercing nose
- Anti-vibration screwgate version now available for added security
- Hot forged I beam construction for high strength to weight ratio
